

A simple guide to RSN online spreadsheets - Economic activity of households for local authority areas across England

This analysis provides a view over time (2010 to 2014) of the economic activity of households within a local authority area of your choice. The analysis shows the rural classification of the selected authority, and plots the average for the respective classification. (data from Annual Population Survey household datasets)

To use the spreadsheet, please follow these steps:

1) Using the mouse, select any of the cells highlighted with a darker grey fill.

2) To the right of the chosen cell, a grey square with a blue triangle appears. Clicking on this presents the full list of options available.

3) Selecting each of the three variables, populates the analysis with the information of particular interest to the user.

NB. where a sample size from the survey was too small to provide an estimate and the result was not considered reliable for practical purposes, no values are shown within this analysis.

I hope this helps. If you have any comments or suggestions, please contact dan.worth@sparse.gov.uk
